

Regulatory Control of Quality of Service Leads Balanced Risk Based Decision Making

Written by Administrator

Wednesday, 23 March 2011 20:44 - Last Updated Tuesday, 09 September 2014 19:18

Arjen G. Jongepier, Walter T.J. Hulshorst, Gabriël A. Bloemhof

As a consequence of the liberalization of energy markets, grid owners and operators (including industries and railways) are re-orientating on asset management and investments. The regulatory authorities, involved in sustaining security, reliability and availability of supply represent the society's requirements...
