

Electromagnetic Compatibility (EMC) Concerns for Distributed Generation Technologies

Written by Administrator

Wednesday, 23 March 2011 21:19 - Last Updated Tuesday, 09 September 2014 19:26

Philip Keebler, Kermit Phipps, Bill Howe

Significant energy performance and power quality testing has been conducted on distributed resource (DR) technologies to determine energy efficiency and susceptibility and immunity to power line disturbances. However, comparatively little electromagnetic compatibility (EMC) testing has been conducted to address radiated and conducted emissions and immunity...
